

FRUIT POWDERS (LOW MOISTURE)

Our low moisture fruit powders, pieces, and granules are made from whole fruit resulting in an all natural fruit ingredient and are offered in numerous sizes and shapes. Since they are dried to a maximum 3.5% moisture with very low water activity, they are ideal for use in shelf-stable products.

Our low moisture products include apple, apricot, date, fig, peach and prune. The apple products provide an excellent neutral base that can be colored/flavored to mimic various other fruits.

Apple Powder

Apricot Powder

Date Powder

Fig Powder

Peach Powder

Prune Powder
